Application/Control Number: 09/954,953

Art Unit: 1623

Claims 1-17 are currently pending in this application.

## 35 U.S.C. 103(a) rejection

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bissery, U.S. Patent 5,908,835.

Claims 1-14 are drawn to methods for the treating various cancers with taxol derivative and doxorubicin sequentially, simultaneously, in alternate order, wherein the dosage of doxorubicin is between 40-380 mg, the taxol derivative is between 50-300 mg, with variable administration intervals and modes of administration.

Bissery teaches the antitumor compositions comprising taxol derivatives in combination with an anthracycline antibiotic (see abstract). Bissery discloses taxol derivatives and doxorubicin combination as active agent for treating breast, ovarian and lung cancers (see col. 4, lines 46-51). Bissery also discloses in col. 4, lines 37-45, the modes of administration which are rendered obvious by the disclosure. Furthermore, under Example in col. 4, lines 56-67, the administration of 100 mg of Taxotere (taxol derivative) and 100 mg of etoposide (anthracycline antibiotic) for use in daily or weekly treatment is disclosed. Bissery differs from the applicant's invention that Bissery does not provide an explicit example of a taxol derivative in combination with the anthracycline derivative

Art Unit: 1623

doxorubicin, however Bissery does provide motivation to use doxorubicin with a taxol derivative, and specifically 4-desacetyl-4-methylcarbonate taxol. Use of a known member of a class of materials in a process is not patentable if other members of the class were known to be useful for that purpose, even though results are better than expected.

Therefore, one of ordinary skill in the art would have found the applicants methods for the treating various cancers with taxol derivative and doxorubicin sequentially, simultaneously, in alternate order, wherein the dosage of doxorubicin is between 40-380 mg, the taxol derivative is between 50-300 mg, with variable administration intervals and modes of administration to have been obvious at the time the invention was made having the above reference before him because Bissery teaches the antitumor compositions comprising taxol derivatives in combination with an anthracycline antibiotic and the modes of administration.

## State of the Art References

The following references further reflect the current state of the art:

Kant (U.S. Patents 6,353,120 and 6,248,908) discloses a process for the synthesis of a C-4 methyl carbonate paclitaxel.

2. Claims 15-17 are free of the prior art. Claims 15-17 are directed to a chemotherapeutic combination composition comprising an effective amount of 4-desacetyl-4-methylcarbonate taxol and doxorubicin, which is not taught or fairly suggested by the prior art of the record.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Devesh Khare whose telephone number is (703)605-1199. The examiner can normally be reached on Monday to Friday from 8:00 to 4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson, Supervisory Patent Examiner, Art Unit 1623 can be reached at 703-308-4624. The official fax phone numbers for the organization where this application or proceeding is assigned is (703) 308-4556 or 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
